

# MANITOWISH WATERS ROAD DEPARTMENT

---

March 8, 2018

## FEBRUARY ROAD REPORT

For the most part a pretty uneventful month again. The month started out very cold with well below zero temperatures then transitioning into somewhat spring like for the latter part of the month.

Winter road procedures for the month: PLOWINGS (4)  
SCRAPINGS (1)  
SANDINGS (2)

At the Transfer Station the wood chips generated are starting to be hauled off.

Asides from our drain line to the septic tank freezing twice at the town garage there really has been no major mechanical breakdowns.

It was discovered that the lights at the Community Building parking lot and Airport Rd. have become inoperable. According to BAUER ELECTRIC a significant short has occurred underground.
