

MANITOWISH WATERS ROAD DEPARTMENT

May 7, 2018

APRIL ROAD REPORT

Compared to last year at this time we are about a month behind schedule prepping for the upcoming season. And that is thanks to the blast of snow we received mid month. We had three snow plowings for the month

We were hoping for the installation and completion of our first phase of all new road signs. It now looks that we'll have them installed sometime this summer. And if feasible, the second phase of signs are ready for ordering and can yet be done this year.

The warning signs for the South Townline/Wild Rice boat landing areas have been ordered.

Our new Ford F450 pickup came in on 4/12. The old pickup has been readied for sale.

On 4/19 along with Town Supervisors Bob Becker and Mike Kramer, I attended the Wisconsin Emergency Management (W.E.M.) seminar in Eagle River.

Preseason maintenance has been started on our lawn/summer equipment.

We were finally able to take down the Christmas pole lights and banners along with the lighted ground decorations at the Community Building.

The crack sealing of designated roads was started on 4/30 by Pitlick and Wick.
