

MANITOWISH WATERS ROAD DEPARTMENT

June 8, 2018

MAY ROAD REPORT

What a far cry from the month of April, beautiful weather graced us for the month of May. And who would have thought it would be near 90 degrees at the end of the month.

The crack sealing of the designated roads has been completed.

All winter equipment has finally been removed from our patrol trucks.

Road limit signs came down on 5/7, along with all the snowmobile crossing signs.

The sweeping of town roads was started and completed during the month.

Upon receiving our new pickup truck, our old pickup was put up for sale and in a few days it was sold for \$19000.

All town gravel roads have been graded.

Town flags were put up on 5/22.

The Koller Park and the Playground bathrooms have been opened up and made operational.

All the town piers/docks have been installed, along with the Star Lake Beach swim buoys and floats.

A posting board was ordered for the new Rest Lake boat launch area, but it was deemed too small.

At the Transfer Site, there is way too much dirt being "mingled" in along with brush. Somehow we need to educate the people as to why this is such a problem. Do we need to inspect every load? Do we need to order special signage? Eliminate after hours dumping?
