

Airport Operations Report: June 2018

- 1) Runway lights are operational. Requested a quote from ADBSAFE who supplied existing runway lights. There are 7 new lights missing their pc board ("light engine") which was taken to fix lightning damaged lights. If possible, will get new pc boards, and 7 more spares will be readily available.

Beacon light updated with new lamps. Spares in garage.

- 2) Ongoing weekly mowing operations.
- 3) Safety painting of fuel area in progress. Painted around terminal, garage, and cold storage.
- 4) HT Glass replaced broken window on the backside of the terminal. Sill underneath replaced window is rotten. I mentioned leakage in other windows on the front side of terminal, and they recommended applying silicone between glass and frame, and not around the outside of the frame. Suspect other sills are rotten from rain leakage over the years?
- 5) Young Eagles Event held on 6/30. 7 pilots took 52 individual passengers on rides. Whole operation ran smoothly with seasoned volunteers.
- 6) No change in GCO status.
- 6) Asphalt repair? Warranty?
- 7) Fertilizing grass runway. Response from Brian Busha, Golf Course Superintendent of Trout Lake Golf Course. Willing to fertilize for approximately \$2000. Will wait for board meeting response before taking action.
- 8) Purchased two UPS to maintain AWOS computer and modems, Pilot Aviation Sentry System, Internet modem and router. These will filter out surges and brownouts that are experienced frequently at the terminal.
- 9) Looking to have a backup for summer help and to assist with winter operations. Only one person available now with physical limitations.
