

MANITOWISH WATERS ROAD DEPARTMENT

September 10, 2018

AUGUST ROAD REPORT

The majority of the month was spent mowing the shoulders of the roads and the never ending trimming of tree limbs.

The first phase (of three) to the replacement of the town road's warning and regulatory signs has been completed. There were 100 signs installed. And there are 189 signs still to be replaced.

Per the Bike Trail Inc., a surface mounted in street pedestrian crosswalk sign was installed at the Marathon Rd. intersection.

At the Transfer Site, the brush pile for this year is adding quite quickly. And the vast majority is attributed to contractors.

There have been no major mechanical breakdowns for the month.
