

MANITOWISH WATERS ROAD DEPARTMENT

October, 8 2018

SEPTEMBER ROAD REPORT

It's that time of the year where we encounter drastic climate shifts bringing us turbulent air and heavy rains which in turn graces us with tree debris and some shoulder washouts.

The new culvert on Alder Lake Rd. has been installed. Since its installation we have had a problem with pesky beavers and or muskrats trying to slow its flow. We are now in the process of designing a "beaver baffle" for it.

Clear Lake Rd. to the bridge has been prepped and readied for paving.

Limbing of trees is an ongoing project.

The new water patrol boat has been removed from the chain, winterized and put into storage.

I have attached a list of 2019 Budget Considerations.

Jerry Blach
