

MANITOWISH WATERS ROAD DEPARTMENT

February 1, 2019

JANUARY ROAD REPORT

Once again somewhat of an uneventful month as far as snowfall totals are concerned. Although the bitter cold for the latter part of the month was way too extreme causing our winter implements to work in slow motion and even freezing up our diesel fueling pump.

Winter road procedures for the month: PLOWINGS (4)
 SCRAPINGS (0)
 SANDINGS (4)

A list of the Phase 2 total road sign replacement project has been put together and will be submitted to Lange Enterprises Inc. for delivery this year. There will be 111 signs ordered.

At the Transfer Station, a facilities engineer from the Packaging Corporation of America (P.C.A.) inspected the pile(s) of ground up wood chips hoping that he could use them for his boilers at his facility. Upon his inspection he stated that he could not use them at this time due to the snow and ice accumulation. He was also concerned about so much dirt mixed in.

And a reminder, we will need to hire a Parks and Rec. employee for the upcoming season.
