March 6, 2019

## FEBRUARY ROAD REPORT

In my twenty plus years of working for the town, I don't believe we've ever encountered the amount of snow that we received for a one month period. And all this came after we started the month with rain creating glare ice on the roads.

Winter road procedures for the month: PLOWINGS ( 8 )  
SCRAPINGS ( 0 )  
SANDINGS ( 1 )

The quick and excessive accumulation of snowfall has hindered our ability to effectively wing back shoulders of our roads. And not to mention the "disappearance" of many mailboxes.

On 2/13 on the #1 Patrol Truck an exhaust manifold gasket blew. The vehicle needed to be towed to Wausau International for repairs. On 2/19 upon completion of the repairs we went to Wausau to bring her back. So far so good.

At the Town Garage our drain pipe to the septic froze. Richardson Septic was called in and relieved our problem.
