

# MANITOWISH WATERS ROAD DEPARTMENT

---

May 13, 2019

## APRIL ROAD REPORT

Towards the beginning of the month it was really trying to turn into spring until we got slammed with a day of very wet and heavy snow near mid month. And it turned out to be our only plowing of the month.

Much of the month was spent readying lawn equipment, the tractor and our patrol trucks for the upcoming season.

At the Star Lake Beach area a much needed brushing/limbing was preformed through out the area.

At the Cemetery, the Veteran's Memorial was given a thorough high pressure cleaning.

At the Transfer Site, still no word on the "chip mountain" situation. And again, is it really cost effective for contractors to bring in so much brush? And who knows what township it comes from.

As far as mechanical breakdown situations, a spinner motor to the #2 truck's sander needed replacing. And after a weeks (on and off) worth of troubleshooting on the #1 truck's plow it was determined the quick disconnects were defective.
