

# MANITOWISH WATERS ROAD DEPARTMENT

---

September 9, 2019

## AUGUST ROAD REPORT

Due to a directive from Excel Energies all ornamental attachments will be removed from the Downtown area power poles. This includes all the banners and its hardware, flags and Christmas decorations.

The mowing of road shoulders was continued for the month. And basically completed.

A repairing of a second "humped" culvert also preformed on Alder Lake Rd. by Kia Asphalt. It too was done well.

The never ending limbing and trimming of tree branches also continues.

At the Powell culvert we have achieved a much better water flow.

Marsh and Circle East roads have been graded.

I took a vacation week.

A quote was received from Pitlick and Wick for a new salt shed pad area and an entrance apron for the garage addition. We are still waiting for Luppino Asphalt to give us one.

Jerry Blach
