

MANITOWISH WATERS ROAD DEPARTMENT

August 7, 2020

JULY ROAD REPORT

Generally July our official start to the tourist summer season had actually started a month or so earlier due to city dwellers trying to escape the Covid 19.

The boardwalk dock sections at Koller Park have been completed. The floating dock sections will be completed at a later date.

At the Rest Lake Park boat landing the two launching docks need to be anchored properly.

A new "drop in" toilet was installed at "Serbin Park". It would nice and necessary if the same types of units could be installed at Star Lake Park. The two there are in horrendous shape. During the summer months these are one of the most used facilities in town. It only makes sense that they be replaced. They are an embarrassment to the town.\

Pulling back and the shouldering of roads is been done.

Mowing of road shoulders is also being done.

A second tech was sent up from Serwe Implements to diagnosis the bucket problem on the John Deere 6330 tractor. He attributed the problem being a bad valve bank. The part has been ordered.
